

Urban Operations Expert Talks 22

„Introducing the Urban Operations Support Cell“

Military operations in urban environments require highly skilled soldiers, sophisticated equipment and efficient civil-military interaction backed by up-to-date expert knowledge. UOET22 will introduce the Urban Operations Support Cell providing specialised advice to headquarters to efficiently cope with the associated requirements.

The three-day #UOET Experience offers presentations, networking, field trips and typical Styrian hospitality. The one-day #UOET Online offers concentrated information.

Registered participants have access to all presentations, papers and recordings.

**Call for Papers: your contributions are highly welcome until 26 06 2022!
Registration and Paper Submission: <https://uoet.unileoben.ac.at>**

The conference venue is remote and has very limited accommodation capacity during the period. Therefore, we recommend booking accommodation in Leoben. Transportation will be provided by the organizing comitee.
